

High-end in-wall speakers

The selection of high-grade materials in combination with accurate acoustics craftsmanship makes the MERO speakers superior in their class.

An elegant look with minimal visual impact is created by the slim grill with very thin border, while great ease and installers convenience is guaranteed using the quick-fix mechanism with Gold-CON connectivities. The grill is held in place using neodymium magnets, providing a quick and stable assembly. Installation can be done both vertically and horizontally, while the rotatable tweeter allows optimal orientation positioning.

MERO2

2" High-end slim in-wall speaker

The ultra-compact size enables the MERO2 to smoothly integrate into any interior like no other loudspeaker. The outer dimensions which measure only 106 x 152 mm and the built-in depth which doesn't exceed 66 mm allows installation in any location and into any surface while being unobtrusive.

Available colors :

MERO5

5" High-end slim in-wall speaker
